R4816-IP Module for Runner™

IP MODULE FOR RUNNER™ & SMARTPHONE MOBILE APPLICATION

The R4816-IP MODULE is an Universal PSTN to LAN reporting module for monitoring over internet.
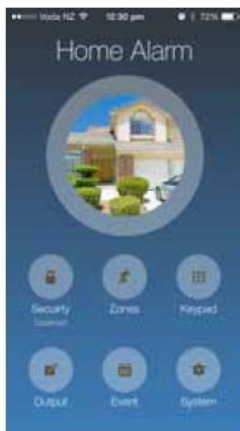

This module converts any Contact-ID signs for your older analogue dialer, into the newer internet reporting protocols and smart phone push notifications.

By using this module, you will be able to give to Runner panels a newer dimension and propose to all of your customers advanced features.
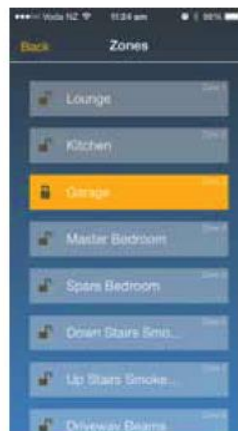

PRODUCT FEATURES

- Receive Push Notification for Alarm activations, Battery low, Mains Fail & Panic alarms
- One touch Remote Arm and Disarm of Alarm System
- Output Control (turn on lights & heats. open garage doors & gates) up to 8 different devices
- View Inputs (see movement around the home, as different detectors are triggered)
- Check past memory events (see when and who disarm/Arm the system last. 16 memory events)
- One App can manage and control multiple site
- Customize the App with photos and Input / Output names
- The Mobile Application is available both for Android and Apple IOS devices
